Executive Summary

Basis: 1Q27 results (Sep 10, 2026) · guidance of Sep 10, 2026 · market close Oct 1, 2026 · written Sep 23, 2026

Operations

- **Record revenue \$19.3bn, +30%**; Cloud +62% with IaaS +121% after 850MW of new capacity; Software -3%.
- **Non-GAAP operating income +31% to \$8.2bn, margin flat at 42%**; S&M -12%, R&D -4%; cloud costs +77%.
- **Non-GAAP EPS \$1.92 (+30%), above guidance**; GAAP EPS \$1.56 (+55%); diluted shares +3% after the ATM.

Guidance and Why It Changed

- **Q2 FY27**: revenue +30-34%, cloud +64-70% cc (65-71% USD), non-GAAP EPS \$1.85-1.93 USD (+21-25% ex-Ampere gain).
- **FY27 raised**: revenue at least \$90bn (+34%) and non-GAAP EPS \$8.10; capex \$90-95bn, net cash capex at most \$70bn.
- **Around half of RPO expected to convert to revenue within 36 months**; new Q1 contracts affect FY28 and beyond (Maxson).

Debt and Ratios

- **Completed the \$20bn at-the-market equity issuance in Q1 (\$19.9bn net)**; stockholders' equity rose to \$67.2bn.
- **Total debt \$125.3bn after \$4.2bn of repayments**; cash and investments \$37.1bn; interest expense +55% to \$1.43bn.
- **New AI contracts structured as prepay or bring-your-own-hardware**: "no incremental impact on its plans to raise capital".

What to Watch in the Next Releases

- **Site execution**: Project Jupiter (Doña Ana, NM) — force majeure notice to the developer on Sep 24, 2026 (Bloomberg) allowing payment delays if the 2028 online date slips; Oracle says the site is on schedule. Gas pipeline delayed to Feb 1, 2027 after permit denials; fuel-cell air permit decision due Nov 23 (TechCrunch). The US\$18 bn project loans were quoted at 89–91 cents (FT, Sep 18). Watch: first energized megawatts against the 1H 2027 target.
- **Power and interconnects across the five named campuses**: Doña Ana depends on on-site gas fuel cells and a delayed pipeline; Shackleford on an on-site gas microgrid; Port Washington on grid supply; Abilene is 618 MW live of 1,200 MW. Watch: energized MW per site each call ({{{sec:sites}}} table).
- **Off-balance-sheet leases**: US\$288 bn of uncommenced data-center leases (15–19 years, starting 2Q27–FY29) on top of US\$34.6 bn operating and US\$9.2 bn finance lease liabilities; lease-adjusted leverage is well above the 2.6× headline ({{{sec:obligations}}}). Watch: the figure in each 10-Q and rating-agency reactions (S&P BBB- since Jul 9, 2026; Moody's Baa2 negative).
- **Funding**: US\$19.9 bn ATM equity done in 1Q27; about US\$20 bn of the US\$40 bn fiscal 2027 plan remains, expected after calendar 2026 per the 4Q26 call. Prepayments (US\$11.4 bn in 1Q27) and BYOH contracts reduce Oracle-funded capex; watch net cash capex against the US\$70 bn guide.
- **RPO conversion**: the 12-month recognition share rose from 10% (1Q26) to 13% (1Q27); around half of RPO is guided to convert within 36 months. Watch the share and the 2Q27 guide (revenue +30–34%, cloud +64–70% cc).
- **Guidance**: fiscal 2027 revenue of at least US\$90 bn and non-GAAP EPS US\$8.10; gross margin expected to flatten as data centers ramp. Watch OCI margins and D&A growth against the 42% non-GAAP operating margin.

Tear Sheet

Next results (2Q27): ~Dec 10, 2026, assumed from Oracle's release history

Metric	1Q27	1Q26	Chg	Chg %	Comments · 1Q27 release and call
Backlog and cloud (US\$ million)					
RPO (remaining performance obligations)	664,000	455,000	209,000	+45.9%	\$664bn, +\$26bn sequentially after \$30bn+ of new AI contracts, mostly prepaid or bring-your-own-hardware: "no incremental impact on its plans to raise capital".
RPO, stated y/y change	45.9%	359.0%	-313.1 pp		
Cloud revenue (FY2026 basis)	11,607	7,186	4,421	+61.5%	OCI +121% as Oracle "brought record levels of new megawatt capacity online" (Maxson); SaaS +10%, Fusion +14%.
Cloud as % of revenue	60.0%	48.1%	11.9 pp		
Profitability and investment					
Non-GAAP operating margin	42.1%	41.8%	0.3 pp		Margin 35% vs 29%; non-GAAP margin "remained around flat" (Maxson) as lower opex offset higher cloud costs.
EBITDA margin	52.1%	40.5%	11.6 pp		Revenue +30% with opex down; D&A +90% as depreciation of new capacity more than doubled.
D&A / revenue	17.4%	11.9%	5.5 pp		Depreciation +134% after 850MW came online; amortization of acquired intangibles -52%.
Operating cash flow (US\$ M)	23,103	8,140	14,963	+183.8%	\$11.4bn of customer prepayments with a significant financing component plus \$4.0bn of other deferred revenue.
Capex (US\$ M)	28,499	8,502	19,997	+235.2%	Net cash outlay \$18.0bn after \$11.4bn of prepayments; FCF -\$5.4bn; FY27 capex "\$90 billion to 95 billion", net cash at most \$70bn (Maxson).
Capex / revenue	147.3%	57.0%	90.4 pp		
Free cash flow (US\$ M)	-5,396	-362	-5,034	+1,390.6 %	Record operating cash flow (\$11.4bn of prepayments) against capex of \$28.5bn; net cash outlay \$18.0bn.
Per share					
Non-GAAP diluted EPS (US\$)	1.92	1.47	0.45	+30.6%	Non-GAAP \$1.92 above the \$1.72-1.76 guide; diluted shares +3% after the \$20bn at-the-market issuance.
Dividend declared per share (US\$)	0.50	0.50	0.00	0.0%	Unchanged at \$0.50.
Diluted shares (millions)	3,000	2,909	91	+3.1%	\$20bn at-the-market equity issuance plus stock-based compensation.

Cloud Revenue by Quarter (US\$ Million, FY2026 Basis) and YoY Change

RPO as Oracle publishes it in each release (rounded to billions). Cloud revenue on the FY2026 presentation basis (Cloud / Software): native from 1Q26, recast by Oracle for FY2025 and unavailable earlier. EBITDA = GAAP operating income + cash-flow D&A; capex and free cash flow for the discrete quarter. Sources: 1Q27 earnings release (Exhibit 99.1 to Form 8-K, Sep 10, 2026) · 1Q27 earnings call (2026-09-10, transcript).

03 · RPO: RPO (Remaining Performance Obligations) Explained

RPO of US\$ 664 bn at 1Q27 · recognition schedule from the Form 10-Q (Sep 11, 2026)

In One Sentence

RPO is Oracle's order backlog: contracted revenue that customers have committed to pay but that Oracle hasn't recognized yet because the service hasn't been delivered. A single multi-year cloud contract signed today adds its full value to RPO immediately, even though the revenue will only show up in the income statement gradually, quarter by quarter, as Oracle actually runs the workloads. That's why RPO can jump sharply in one quarter (from signing a few very large AI infrastructure contracts) well before revenue catches up.

What Oracle Says in the 10-Q

"Remaining performance obligations were \$664 billion as of August 31, 2026, of which we expect to recognize approximately 13% as revenues over the next twelve months, 37% over the subsequent month 13 to month 36, 34% over the subsequent month 37 to month 60 and the remainder thereafter."

Oracle Form 10-Q for the quarter ended August 31, 2026 (Sep 11, 2026)

Reading It

- RPO is a useful leading indicator of demand, not a guarantee: contracts can be modified or, in rare cases, cancelled, and the conversion pace depends on Oracle actually building and energizing enough data-center capacity to deliver the workloads — which is precisely why capital expenditure (capex) is the metric to watch alongside it.
- It is a leading indicator, not assured revenue: conversion depends on the capacity Oracle builds and energises, which is why it is read with capex and the sites.

Recognition Schedule (US\$ Billion of the 664 RPO)

Recognition horizon	%	Amount
Next 12 months	13%	US\$ 86 bn
Months 13-36	37%	US\$ 246 bn
Months 37-60	34%	US\$ 226 bn
Beyond 60 months	16%	US\$ 106 bn

RPO by Quarter

Quarter	RPO	stated y/y
4Q25	US\$ 138 bn	+41%
1Q26	US\$ 455 bn	+359%
2Q26	US\$ 523 bn	+438%
3Q26	US\$ 553 bn	+325%
4Q26	US\$ 638 bn	+363%
1Q27	US\$ 664 bn	+46%

What Oracle Has Committed to Deliver (Latest Call First)

- 1Q27** · FY2027 capex of US\$90-95 bn with net cash capex of at most US\$70 bn after customer prepayments; revenue and earnings to accelerate in the second half as more megawatts come online.
- 1Q27** · First NVIDIA Vera Rubin systems to customers in 2Q27 at Shackelford, “our next gigawatt-scale campus”.
- 1Q27** · New Mexico and Wisconsin (about 1 GW each) have no impact on the FY2027 revenue or earnings guidance; large sites come online phased over many quarters, and “some sites are ahead of schedule, some sites are more difficult than others”.
- 4Q26** · 1Q27 deliveries approaching 1 gigawatt, nearly as much as the previous four quarters combined.

Map locations are approximate (county or township). Capacity, customer and developer come from Oracle where it disclosed them, otherwise from the developers' releases or the press cited on the page (detail and links per site at fnam.mx/oracle, sites section). Utilization and renewals as stated on the earnings calls. Sources: call transcripts, Oracle and developer releases.

05 · Sites & Power: the AI Cloud Infrastructure Buildout

1Q27 figures (Sep 10, 2026) and the earnings calls · US\$

Contracts (RPO) set demand; data-center partners and Oracle's capex create the capacity; debt, equity and customer prepayments fund it; megawatts delivered turn into cloud revenue. Capex growing ahead of revenue is the essence of the buildout: capacity is paid for before it is billed.

Operating Cash Flow, Capex and Free Cash Flow by Fiscal Year (US\$ Billion)

- Free cash flow = operating cash flow - capex; recent quarters' operating cash flow includes customer prepayments on cloud contracts. Cash dividends paid and buybacks are not part of the model (the annual cash-flow lines are not harvested from the 10-K); dividend per share is the declared amount summed by fiscal year.

07 · Off-Balance-Sheet Financing and Leases

Form 10-Q at Aug 31, 2026 (leases and commitments notes) · model net debt and LTM EBITDA (LTM 1T27) · derived ratios

2.60x

net debt / LTM EBITDA, as reported

3.54x

lease-adjusted: (net debt + operating leases 34.6 + finance leases 9.2 bn) / EBITDAR 37.3 bn

11.3x

commitment-inclusive: + US\$ 288 bn of uncommenced leases, nominal, undiscounted

US\$ 34.2 bn

purchase obligations (power, equipment and other), non-cancelable

What Oracle Owes, in Two Groups (US\$ Billion)

Item	US\$ bn	Where it sits
Recognized liabilities (on the balance sheet)		
Bonds and other borrowings	125.3	notes payable, current and non-current
Operating leases	34.6	right-of-use asset 34.0
Finance leases	9.2	right-of-use asset 8.9
Total recognized liabilities	169.1	debt and leases on the balance sheet
Memo: cash and marketable securities	(37.1)	netted for net debt
Future contractual commitments (not on the balance sheet)		
Leases signed, not yet commenced	288	leases note · 15–19 years · commence 2Q27–FY2029 · nominal
Purchase obligations	34.2	reported separately in the 10-Q (commitments note) · schedule at right
Lessor or other guarantees	not disclosed	neither the 10-Q nor the 10-K discloses off-balance-sheet guarantees

Uncommenced Leases at Each Report (US\$ Billion, Nominal)

As of	US\$ bn	Per the leases note
Aug 31, 2025	99.8	terms ten to sixteen years; commencing 2Q26 to FY2028
Nov 30, 2025	248	terms fifteen to nineteen years; commencing 3Q26 to FY2028
Feb 28, 2026	261	commencing 4Q26 to FY2028
May 31, 2026	260	commencing 1Q27 to FY2029
Aug 31, 2026	288	commencing 2Q27 to FY2029

EBITDAR = LTM EBITDA (US\$ 33,937 M) + LTM operating lease cost (US\$ 3,320 M). The commitment-inclusive ratio adds the nominal value of uncommenced leases without discounting or projecting future EBITDA: it measures exposure, not current debt. Peer set chosen by the owner; latest balance sheet and latest fiscal-year flows per their SEC XBRL data (* IBM reports no operating income: EBIT = pre-tax income + interest). Guarantees: FY2026 10-K, leases note (p. 90): the \$260 billion of lease commitments not yet commenced "include a lease for which we have guaranteed up to \$3.3 billion of the lessor's borrowing, which matures in September 2026." The August 31, 2026 10-Q does not repeat it and discloses no residual value guarantees. Per the owner's rule (the SEC filing governs; when in doubt, the 10-K), the guarantee is shown as exposure, never as a liability, until a later filing reports its release. Sources: 1Q27 Form 10-Q, FY2026 10-K, SEC XBRL.

Developer Financing per Campus (Their Releases or the Press; Not an Oracle Liability)

Campus	Developer	Developer financing	Source
Abilene, TX	Crusoe (with Lancium)	Crusoe project financing backed by Blue Owl Capital's real-assets platform and Primary Digital Infrastructure; about US\$15 bn raised for the campus (Crusoe)	1Q27 call p.6 · 4Q26 call p.7 · Crusoe PR
Shackelford Co., TX	Vantage Data Centers (DigitalBridge portfolio company)	Vantage / DigitalBridge-backed development; Oracle has not disclosed its own commitment beyond the capacity contract	4Q26 call p.7 · 1Q27 call p.6 and Q&A · Vantage/DigitalBridge PR 18 Aug 2025
Doña Ana Co., NM	BorderPlex Digital Assets with Stack Infrastructure (a Blue Owl Capital unit); financed with US\$18 bn of loans (FT, 18 Sep 2026) under a US\$165 bn industrial revenue bond authorisation	Not disclosed by Oracle; press reports describe a project loan facility. Oracle reports nearly US\$1 bn of contracts with New Mexico suppliers and ~US\$100 m of gross-receipts taxes paid (Jul 2026)	4Q26 call p.7 · 1Q27 call Q&A p.9-10 · Oracle PR 27 Apr 2026
Saline Twp., MI	Related Digital (Related Companies)	Related Digital with Blackstone (named by Oracle at the June 2026 construction event); Oracle's own commitment not disclosed	4Q26 call p.7 · Oracle PR 1 Jun 2026 · Related PR 30 Oct 2025
Port Washington, WI	Vantage Data Centers (DigitalBridge portfolio company)	Vantage / DigitalBridge-backed development with new zero-emission energy capacity (solar, wind, storage); Oracle's own commitment not disclosed	4Q26 call p.7 · 1Q27 call Q&A p.9-10 · Business Wire 22 Oct 2025

No single customer accounted for 10% or more of total revenues in fiscal 2026, 2025 or 2024 (FY2026 10-K). Oracle does not disclose customer concentration within RPO. S&P Global Ratings estimates roughly half of the US\$638 bn RPO at May 31, 2026 is tied to OpenAI (rating action, 9 Jul 2026). Oracle does not disclose the split of RPO between prepaid, bring-your-own-hardware and Oracle-funded capacity; the cumulative figure it gave at 4Q26 was about US\$75 bn of prepayments and BYOH contracts (4Q26 call). Sources: 1Q27 Form 10-Q (cash-flow statement and balance sheet), SEC XBRL, 4Q26 and 1Q27 calls, S&P Global Ratings, developer releases.

- Recommendations (45 analysts): 30 buy · 6 overweight · 8 hold · 0 underweight · 1 sell. Price target: mean US\$ 243, median US\$ 240, range US\$ 110–400; 3 raised and 12 lowered in the last month. Sell-side consensus compiled by FactSet; not a recommendation.

Forward multiples = price (or EV) over FactSet NTM consensus. Consensus EPS follows the brokers' majority basis (non-GAAP for Oracle) and EBITDA is broker-adjusted, not the model's GAAP EBITDA. Peers' EV = FactSet market value + net debt of the latest reported quarter (FactSet Fundamentals); Oracle's row uses the same FactSet basis so the columns compare like for like; its multiples on reported net debt are in the tiles above. Sources: FactSet Estimates, FactSet Global Prices, FactSet Fundamentals; Oracle releases (net debt); Nasdaq (price).

Date	Theme	What happened	Why it matters	Basis and source
Sep 25, 2026	Power and sites	WSJ: power and permitting hurdles at Project Jupiter (Doña Ana County, New Mexico)	Doña Ana is one of the five named campuses (about 1 GW) behind the US\$288 bn of leases signed but not yet commenced; a delayed energisation defers both the lease liability coming onto the balance sheet and the revenue the capacity would carry. Oracle said the site has no impact on FY2027 guidance (1Q27 call).	press · Wall Street Journal, Sep 25, 2026: Cracks in Oracle's AI Data-Center B
Sep 25, 2026	Financing	FT: Oracle remains liable for Project Jupiter lease payments despite the force majeure notice	Lease payments owed regardless of energisation would be a fixed charge without matching revenue; the terms are not disclosed in Oracle's 10-Q, so the exposure is shown on this page as 'not disclosed', not as a liability.	press · Financial Times, Sep 25, 2026: Oracle on the hook to pay data centre i · Bloomberg, Sep 25, 2026: Oracle Notice to Weigh on Data Center Debt, M
Sep 25, 2026	Leadership and governance	Proxy statement (DEF 14A) filed for the annual meeting of November 18, 2026	The proxy carries the executive-compensation tables, the board slate and any equity-plan authorisations that affect share count and stock-based compensation (a Non-GAAP reconciling item).	SEC filing · Schedule 14A (DEF 14A), filed Sep 25, 2026 · Notice of internet availability (DEFA14A), filed Sep 25, 2026
Sep 24, 2026	Power and sites	Oracle sends a force majeure notice to the Project Jupiter developer; says the site remains on schedule	First documented friction on a named campus. It bears on the timing of the uncommenced leases (US\$288 bn, 2Q27–FY2029 starts) and on management's first-half-2027 delivery target for the site.	press · Bloomberg, Sep 24, 2026: Oracle Cites 'Force Majeure' to Shield Itself · Albuquerque Journal, Sep 24, 2026 (Oracle VP Michael Egbert: 'fully co
Sep 18, 2026	Financing	FT: about US\$18 bn of Project Jupiter loans quoted at 89–91 cents on the dollar	The loans sit with the developer, not Oracle: they are not on Oracle's balance sheet and this page does not treat them as Oracle debt. Their price is a market read of the lease's creditworthiness and of the cost of future developer financings behind Oracle's leases.	press · Reuters, Sep 18, 2026 (reporting the FT): Oracle's \$18 billion data ce · Syndicated copy (AOL)
Sep 12, 2026	Leadership and governance	Larry Ellison cancels the Rule 10b5-1 plan to sell up to 50 million shares; no shares were sold	A 50 million-share sale would have been about 1.7% of the 3,024 million shares outstanding (10-Q cover, Sep 7, 2026) coming to market during the quarter after a US\$19.9 bn at-the-market issuance; its cancellation removes that supply.	company, not audited · Form 8-K, Items 8.01 and 9.01, filed Sep 14, 2026, report date Sep 12, · Oracle Investor Relations, Sep 12, 2026: Larry Ellison Cancels His Pla
Sep 11, 2026	Accounting and filings	1Q27 Form 10-Q: US\$288 bn of leases signed but not yet commenced; US\$11.4 bn of customer prepayments; ATM equity completed	This is the filing behind the off-balance-sheet section: the US\$288 bn is undiscounted and off the balance sheet until each site is handed over; the prepayments explain why operating cash flow (US\$23.1 bn) exceeded net income in the quarter.	SEC filing · Form 10-Q, quarter ended Aug 31, 2026, filed Sep 11, 2026 · SEC XBRL company facts (machine-readable values of the same filing)
Sep 10, 2026	OCI contracts	1Q27 results: revenue US\$19.3 bn (+30%), RPO US\$664 bn, capex US\$28.5 bn; FY2027 revenue guided to at least US\$90 bn	The quarter is the base of every statement, ratio and guidance comparison on this page; the net-cash-capex guide (US\$70 bn) is the figure the free-cash-flow section tracks against prepayments. 11 · Risks

Register reviewed Oct 3, 2026 · each risk cites the figure or filing behind it

Risk	Public evidence	Where	What to watch
Execution: the buildout must energise enough capacity to convert RPO	RPO of US\$664 bn (1Q27) against 850 MW delivered in the quarter and five named campuses of about 5.6 GW planned, of which 733 MW are energised per the calls; Oracle: 'some sites are ahead of schedule, some sites are more difficult than others' (1Q27 call).	03 RPO · 05 Sites & power	Energised MW per site on each call; the 12-month RPO recognition share (13% at 1Q27).
Fixed charges from leases: US\$288 bn signed but not yet on the balance sheet	Uncommenced leases of US\$288 bn (undiscounted, 15–19 years, commencing 2Q27–FY2029) on top of US\$34.6 bn operating and US\$9.2 bn finance lease liabilities (1Q27 10-Q). Press reports (FT, Sep 25, 2026) say Project Jupiter rent is owed even without power; Oracle's 10-Q does not disclose the terms.	07 Off-balance-sheet	The uncommenced figure in each 10-Q; the weighted-average term and start of new leases; any disclosure of guarantees or termination rights.
Funding and ratings: about US\$20 bn still to raise in fiscal 2027, one notch above speculative grade at S&P	Notes payable US\$125.3 bn and net debt US\$88.3 bn at 1Q27; S&P BBB-/stable (Jul 9, 2026), Moody's Baa2/negative (Jul 28, 2025), Fitch BBB/stable (Feb 2026); US\$19.9 bn ATM done of the US\$40 bn fiscal-2027 plan (4Q26 call); 5-year CDS about 203 bp in July 2026 (Bloomberg).	06 Financing	The instrument and coupon of the remaining raise; rating-agency actions after each 10-Q; lease-adjusted leverage versus the agencies' thresholds.
Customer concentration: Oracle names no customer; S&P estimates about half of RPO is OpenAI	Oracle's 10-K discloses only that no customer exceeded 10% of revenue in fiscal 2026; S&P's July 2026 rating action estimates roughly half of the US\$638 bn RPO at May 31, 2026 is tied to OpenAI (third-party estimate, not an Oracle disclosure). Four of the five named campuses list OpenAI as the tenant.	08 Circularity	Any 10% customer disclosure in the 10-K; the prepaid / bring-your-own-hardware share of new contracts; counterparty financing announcements.
Power and permitting: on-site generation and pipelines gate the named sites	Doña Ana depends on up to 2.45 GW of fuel cells and a gas pipeline delayed to February 1, 2027 after permit denials, with an air-permit decision due November 23, 2026 (Oracle release Apr 27, 2026; TechCrunch Sep 24, 2026); Shackelford runs on an on-site gas microgrid per press; Port Washington on grid supply.	05 Sites & power	Permit decisions and pipeline in-service dates; first energised megawatts at Doña Ana and Shackelford against the first-half-2027 target.
Margins and asset lives: data-center ramp compresses gross margin; servers are depreciated over six years	Management expects gross margin to flatten as data centers ramp (1Q27 call); depreciation US\$3,156 M in 1Q27 versus US\$1,351 M a year earlier (XBRL); servers and networking equipment are depreciated over an estimated six-year life (1Q27 10-Q, Note 3). A shorter life would raise depreciation on the same capex.	01 Statements · 04 Capex & FCF	Depreciation growth against cloud revenue growth; any change to the useful-life policy in the 10-K.

Methodology

- Quarters, YTD and LTM: Oracle prints the cash-flow statement cumulatively; discrete quarters are derived by difference and checked against the annual total. Last twelve months sums the four most recent quarters; the balance sheet is always the period-end position.
- Revenue basis: from 1Q26 Oracle presents Cloud / Software; earlier periods are shown as Oracle itself recast them when compared with later ones. Guided cloud growth is compared on that basis.
- EBITDA = GAAP operating income + cash-flow D&A. Net debt = notes payable and other borrowings - cash, equivalents and marketable securities. Non-GAAP as Oracle defines and reconciles it in every release.
- Next results: once Oracle publishes the date it is marked "confirmed"; until then it is assumed from the median lag between quarter-end and release for the same quarter in the previous three years.
- Market: daily closes (price only, dividends not reinvested); shares outstanding from the 10-Q cover page. Call quotes come from transcripts supplied by the author and are not republished.
